

IS THE OPEN ROAD YOUR WORKPLACE?

Driver Rater

Getting you home safely...

Imagine if every time you went to work someone would come into your workspace and do something erratic or dangerous that could put your life at risk..... What impact would this have on you? How would you feel? Would you learn to resent it?

The fact is, if your business has a fleet of vehicles on the road then your employees deal with this issue almost every single day.

The costs of this to your business, your employees and the wider community are immense and not restricted to dollar terms.

Governments and the Police do their part, but we all know that dangerous, erratic, and aggressive drivers get away with it the vast majority of the time. Until that moment, that one-time things go wrong, and sadly too often someone gets hurt or worse.

Driver Rater Pty Ltd aims to make the roads a safer place to work. Our system, over time will start to identify these dangerous drivers and allow employers, insurance companies and the wider community to pressure them into reconsidering their driving behavior.

But to do this we need your help.

So, by signing up to DriverRater, not only do you get the benefit of using all our App's functions and features at a price far cheaper than any other product on the market but together we might make a difference.

If together, we can prevent one accident, save only one life.....

It's worth it!

Here's why the DriverRater system is a good fit for your Corporate Entity.

1. PEACE OF MIND

- The DriverRater system allows you to cheaply put a Dashcam in every vehicle you operate. There are multiple benefits to having Dashcams in your vehicles. These include legal protections for both your business and your Employees in the event of an accident. Translating into savings of thousands; if not, tens of thousands of dollars for you or your business.
- Using the DriverRater system allows your business to give adequate attention to the "Duty of Care" owed by you to your employees, your customers and other road users.
- DriverRater becomes an integral part of your businesses Workplace Health & Safety systems. Giving you the edge when it comes to "ticking the boxes" and keeping the bureaucrats off your back.
- And last but not least, savings on the cost of insurance. Just ask your insurance broker how much of a discount he can negotiate on your fleet insurance.

2. REAL TIME VEHICLE TRACKING

- Know where your vehicles are at all times simply by using your "Corporate Portal" on the DriverRater website.
- This allows you to supply up to date delivery information to your customers without the need to contact your drivers.
- Even if your Fleet is already using a GPS tracking system DriverRater can provide a backup when you are dealing with technical issues.

3. DRIVER MANAGEMENT SYSTEM

- Easily manage your driver's vehicle allocation through your "Corporate Portal" on the DriverRater website.
- Receive real time feedback of your employee's driving behavior, backed up with pictures and video. Giving you the ability to coach, counsel or intercede before an accident occurs.

4. BRAND PROTECTION & PROJECTION

- As a part of the deal, DriverRater will supply your corporate entity with a simple "Bumper sticker" stating that "This business values safe driving." By displaying this sticker on your vehicles, you are reminding your community that yours is an ethical business that takes its responsibilities seriously. Reinforcing the benefits of road safety within your community and thus improving your public profile.

5. PRICE

- What's more! You get all of the above-mentioned benefits **for less than \$1USD per month, per vehicle.** (Based on a yearly subscription) A fraction of what it would normally cost for just one of these benefits.

How does it work

1. Signup directly through www.driverrater.com.au
or
Leave your contact details and one of our sales team will get you sorted.
2. Once the Signup process is complete you will receive your Corporate Code which allows you access to your Corporate Portal through the DriverRater website. www.driverrater.com.au
3. You will also receive your driver reference codes which will allow your drivers; once they've downloaded our App to their smartphones, to link that App to your Corporate account.
4. Train your drivers on how to use the App. Your DriverRater Sales team member is ready to assist with this process.
5. Train your Administration team, again with the assistance of our sales team, to use the Corporate Portal and provide an email address to receive notifications of driver behavior.

FINALLY..... GET STARTED!

Our sales teams are keen to speak with you...
